Wandhalterung befestigen

Benutzen Sie zwei Schrauben/Befestigungselemente mit einer Mindestbelastbarkeit von jeweils 4 kg.

Besonderer Hinweis zu Leichtbauwänden

Wenn Sie BeoLab 4 an eine Leichtbauwand (Gipskartonwand) hängen möchten, müssen Sie die Wandhalterung an einer vertikalen Stütze montieren. Benutzen Sie zwei 5-mm-Schnellbauschrauben, die durch den Gips und mindestens 25 mm in eine vertikale Stütze geschraubt werden müssen.

Wall Bracket 2179 – BeoLab 4

The information in this Guide is primarily intended for the installer!

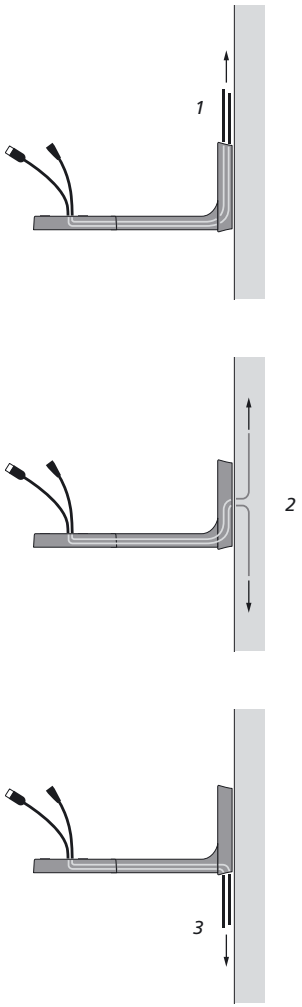
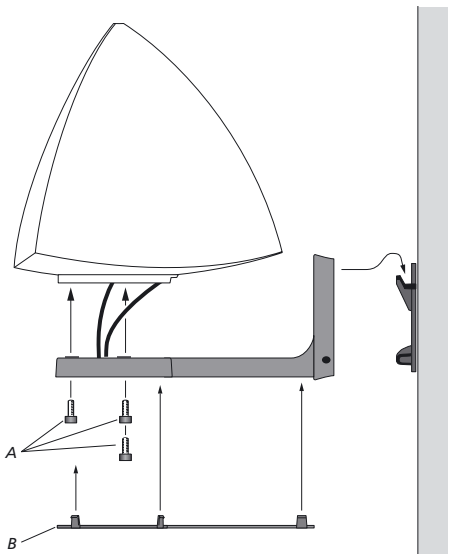
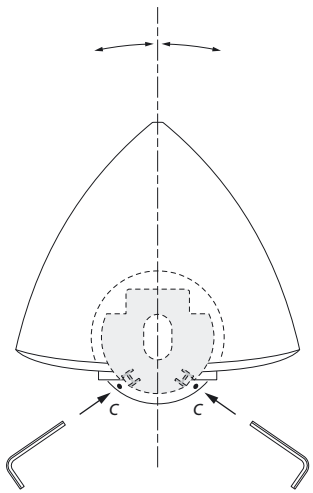
BANG & OLUFSEN

Example 1, 2, or 3 ...?







Fastening the wall bracket
Two screws/fasteners with a minimum load rating of 4 kg (8 lbs.) each must be used.

Special notice about light partition walls
If you intend to hang BeoLab 4 on a gypsum wall (also known as drywall or wallboard), the wall bracket must be fastened to a vertical stud. Use two lag screws (5 mm – 0.2"), which penetrate the gypsum, and are screwed a minimum of 25 mm (1") into a vertical stud.

Fixation du support mural
Utiliser deux vis/fixations résistant chacune à une charge minimale de 4 kg (8 lbs).

Note particulière concernant les cloisons légères
Si vous avez l'intention d'accrocher BeoLab 4 sur une cloison en placoplâtre (également appelée mur en maçonnerie sèche ou plaque mixte), le support mural doit être fixé à un montant vertical. Utilisez deux vis à bois (5 mm – 0.2"), capables de pénétrer dans le plâtre et vissées d'au minimum 25 mm (1") dans un montant vertical.

Fijación del soporte de pared
Deben usarse dos tornillos/pernos con una capacidad de carga mínima de 4 Kg (8 libras).

Aviso especial acerca de las paredes divisorias finas
Si pretende colgar su BeoLab 4 en una pared de yeso (también conocida como tablarroca o tablero para tabiques), el soporte de pared deberá fijarse a un taco de madera vertical. Debe utilizar dos tirafondos de 5 mm (0.2") que penetran en la pared de yeso y se atornillan un mínimo de 25 mm (1") en el taco de madera vertical.
